Walker-King.
Mr. Alfred G. Walker and Miss Linnie King were married at the home of the bride's parents, Mr. and Mrs. I. H. King, at 4:00 o'clock Thursday afternoon, the Rev. J. W. Long, pastor of the Methodist Church, officiating.
Immediately after the ceremony the newly married couple left by auto for Dunlay where they boarded the east bound train for Houston, Galveston and other points on a bridal trip. They will be "At Home" in Hondo after July 6th.
The wedding was a very quiet one, only the immediate relatives of the contracting parties being present.
Both the bride and groom are popular members of Hondo's social circles and have a large circle of warm friends who will rejoice with them in their happiness and trust that their journey down life's pathway side by side may prove one of unalloyed pleasure.
Mr. Walker has an enviable record as a business man, he having for the past several years been the general manager of the Hondo Light, Power & Ice Co., and to his executive ability can be accredited the success attained by the company since he assumed the management.
The bride is a native of Medina county and is a member of one of our pioneer families. She is universally esteemed and admired for her many graces, and the groom is to be congratulated on winning her as a help meet. She has always taken a prominent part in church work, always doing what she could to make the community a better place in which to live.

600 Soldiers Naturalized.
600 aliens, all soldiers, were made citizens of the United States at the special session of the federal court for the western district of Texas at Camp Travis last Saturday, June 1st. Some of the men had voluntarily enlisted in the army while others had been drafted. More than 300 others have applied for naturalization. This wholesale naturalization was made possible by the new law which authorizes a federal judge to administer the oath of allegiance to an alien in the military service of the United States, when two officers, who are acquainted with him, will make oath that in their opinion he will fulfill the requirements of a good citizen.
Nearly every nationality with the notable exceptions of Chinese and Japanese was represented among the 600 aliens who were naturalized last Saturday.—Galv. News.

Summer Normal.

The Hondo Summer Normal opened last Monday morning, about forty pupils being present to take the course. Quite a number of visitors were present and several very interesting addresses were made.

The effect of the war is noticeable in the normal as in every other sphere of worth-while endeavor. In all of the previous normals conducted here a large percentage of the students have been young men endeavoring to prepare themselves for service in the school room. At this term the student body is composed largely of young ladies.

The Anvil Herald trusts the sojourn of both the faculty and student body in Hondo will prove one of the most pleasant epochs in their lives as well as one of the most profitable.

TO ALL WHO EAT

EAT AN ONION FOR YOUR HEALTH'S SAKE
—EAT AN ONION AND HELP SAVE THE VALLEY CROP.

Try Out These Food Administration Onion Recipes, and, Through Good Appetite, Give Zest to Your Own Life, and Release Concentrate Foods for Our Soldiers.

At present there are 8,000 acres of land in the Rio Grande Valley from which have been produced \$5,000,000 worth of onions. This means a shipment of approximately 15,000 cars and under present

conditions only ten thousand cars can be secured. The result is that we will have 5,000 carloads which we must take care of in Texas and in Southern territory. For this reason the Federal Food Administration for Texas has entered into interest with the onion growers and is assisting them in securing transportation and is also doing everything in its power to secure onions as a food.

The recipes given below have been carefully prepared by Miss Lou Stallman, Government Food Demonstrator.

CREAM OF ONION SOUP.

1 cup of cooked and sieved onions
1 cup of liquor in which onions were boiled

1 cup of milk
1 1/2 tablespoons rice flour
1 1/2 tablespoons vegetable oil
Salt and pepper to taste

Cook onions until tender and mash through a sieve, reserving one cup of liquor in which onions were cooked. Combine onions, liquor, seasoning, fat and milk, then bind with the rice flour moistened with a small amount of cold milk. Cook until slightly thickened. A few celery leaves cooked in the mixture will give an added flavor. Strain out before serving.

ESCALLOPED ONIONS.

Place boiled onions in an oiled baking dish and cover with white sauce. Sprinkle oiled crumbs over the top. Crumbs may be made from left over biscuits, muffins, etc., made from substitute flours. Oil with peanut oil. Bake until a delicate brown. Season crumbs well with salt and pepper.

BUTTERED ONIONS.

Boil as above, seasoning with margarine, salt and pepper. If butter is desired, seasonings, reduce the quantity normally placed on the table for family use by just so much. Butter should not be used in cooking.

BAKED ONIONS.

Peel, wash and bake in oven around meat roast, basting with the juice from the meat, or with hot water to which oil has been added, the 1/2 cup of hot water and 2 tablespoons of oil.

ONION SOUFFLE.

Cook onions, rub through sieve. There should be 1 1/2 cups of onion pulp. Heat 4 tablespoons of oil and add 4 tablespoons of rice flour. Pour on gradually 1 1/2 of a cup of water left from the onions and 1 1/2 of a cup of rich milk. Add onion pulp and bring to the boiling point. Season with salt and pepper. Cool partially. Beat the yolks of three eggs until thick and lemon juice and add to the first mixture. Cut and fold in the whites of the 3 eggs beaten until stiff and dry. Place in an oiled baking dish and bake 25 minutes in a moderate oven. Serve at once.

ONIONS STUFFED WITH PECANS (DELICIOUS).

4 onions
4 tablespoons bread crumbs
Salt and pepper
2 teaspoons chopped parsley
4 tablespoons chopped pecans
1 tablespoon oil (vegetable)
1/2 egg
2 tablespoons white sauce (or enough to bind).
Cook onions whole, having been careful not to cut root end off too close. Cool and remove center. Chop center and nuts. Add crumbs, oil, salt, pepper, parsley, egg and sauce. Sprinkle inside shell with salt. Fill with mixture and pile it by on top. Bake until delicately browned. Serve with white sauce to which 1/2 cup fresh peas have been added.

NEW MEAT PROGRAM CALLS FOR ECONOMY

The new meat program of the United States Food Administration does not contemplate a definite quantity of meat per person, and through an inaccuracy in transcribing the telegram from Washington the phrase was used that the "ration would be one and a quarter pounds per person per week," whereas the statement should have read that the present meat ration in France and England is one and one-quarter pounds of meat a week.

In deciding upon a program of retrenchment in the consumption of meat the United States Food Administration does not include "Meatless Days," but it puts it up to every American to cut down his meat consumption and that of his family:

First: By eliminating every ounce of waste.

Second: By curtailing purchases and buying more closely.

Third: By serving smaller portions.

NOTED LECTURER ON TEMPERANCE ENDORSES TANLAC.

One of the features that distinguishes Tanlac from all other proprietary medicines is the large number of prominent people who everywhere are given their unqualified endorsement. Among the statements recently received at the Tanlac office is one in particular that is sure to arouse widespread interest throughout the country, having been made by Mrs. Martha R. Stone, of 7225 Third Ave., North West, Seattle, Wash., noted temperance lecturer who for many years was associated with the late Frances E. Willard, founder of the W. C. T. U. In relating her experience with Tanlac Mrs. Stone said:

"I think it is the duty of everyone who had been relieved as I have to do what they can to help others; therefore it gives me much pleasure to tell of the benefit I have derived from the use of Tanlac."

"I was a great sufferer for many years with nervous trouble, which became so bad that I had to take to my bed, where I lay for six weeks entirely helpless and unable to move. The least little noise would upset me and I was not allowed to see anyone for fear it would excite me, and I was told that my entire nervous system had suffered a total collapse. You see, I had passed through the great San Francisco fire in which I lost everything I possessed, and the experience was a severe shock to my already overwrought nerves. When at last I was able to get out of bed I would have such awful dizzy spells that everything in my room seemed to spin around as though I was in the center of a whirlpool. My stomach was so weak and my appetite so poor that I hardly ate a thing, and what little I forced down soured and formed gas that pressed up into my throat and in my chest and made me so hoarse that it was an effort for me to speak. I also suffered much pain in the lower part of my body from this same gas pressure. My liver, too, was all out of order and my kidneys gave me no end of trouble."

"When my son-in-law saw that the medicines I was taking were doing me no good, he induced me to try Tanlac, as he said it had done him so much good he believed it would help me too. To oblige him I got me a bottle and the first few doses soon convinced me that it was just what I needed, and my first bottle put me right on my feet. I am now on my second bottle and am in splendid shape, for my nerves are practically in a normal state for the first time in all these years, which I consider a remarkable thing. I have a fine appetite and can eat most anything I want without suffering any unpleasantness afterwards. Tanlac is fast helping me to overcome my troubles, and I feel that I am getting on just fine ever since I began taking it."

Tanlac is sold in Hondo by W. H. Windrow, in Devine by Lion Drug Store, in D'Hanis by Louis Carle, in LaCoste by Dickey Drug Co., and in Dunlay by Louis A. Haby.

Whooping Cough.

In this disease it is important that the cough be kept loose and expectoration easy, which can be done by giving Chamberlain's Cough Remedy. Mrs. P. H. Marun, Peru, Ind., writes: "My two daughters had whooping cough. I gave them Chamberlain's Cough Remedy and it worked like a charm."

Respectfully,

JEFFERSON JOHNSON, Postmaster.

Sour Stomach.

This is a mild form of indigestion. It is usually brought on by eating too rapidly or too much, or of food not suited to your digestive organs. If you will eat slowly, masticate your food thoroughly, eat but little meat and none at all for supper, you will more than likely avoid the sour stomach without taking any medicine whatever. When you have sour stomach take one of Chamberlain's Tablets to aid digestion.

Sabinal Sentinel Sightings.

Mrs. Frank Hoag and little Virginia Belle and Miss Lucy Hoag of Sabinal spent Saturday and Sunday with Mr. and Mrs. W. S. Monkhouse.

Mrs. George A. Black of California was here a few days visiting her sister, Miss Vera Jones. She went to Hondo Monday evening.

The Tepary Bean.

BY FLETCHER DAVIS, Field Agent State Dept. of Agriculture.

The development of agriculture in the dryer sections of Texas, coupled with the general demand for protein-producing crops, has called for a legume which is adapted to this dry, hot climate and which will at the same time respond profitably to irrigation where the same is practicable. The Tepary Bean promises to answer this need. It has been grown successfully, both by dry-farming and by irrigation, along the Rio Grande as far south as the lower valley. It was grown successfully as far east as Robertson Co. in 1917. And out of a dry-farming test of some thirty-odd varieties of legumes at the Temple-Belton Experiment Station during the dry season of 1917, the Tepary produced the best yield of all. It has thus demonstrated its adaptability to a wide range of climate and a variety of soils.

The Tepary Bean is a legacy handed down to civilization by the Papago and the Pima Indians of New Mexico and Arizona, by whom it has been cultivated since prehistoric times in that semi-arid country. There are more than forty varieties, but the white is the one most commonly grown as it produces as heavily as the other varieties and is more desirable as a table bean. The Tepary absorbs moisture more readily than other beans, hence it is easier to secure a good stand on lands where the soil moisture is low. It withstands long seasons of drouth without serious injury and responds to a returning moisture supply with vigorous growth. And being inured to the extremes of temperature peculiar to its place of origin, the mountain regions of Arizona, it will bloom and set seeds when other beans would fail. Maturing in about 100 days, it can be planted at any time after the danger of frost is passed until late in the summer in the southern sections of the State.

The soil should be flat broken to a depth of eight or ten inches and put in a good state of tilth for Teparies. They may be planted in rows about three feet apart, depending on convenience in cultivating with the implements available and in drills about 12 inches apart. This will require about twelve pounds of seed per acre. They should be planted only in moist ground and covered deep enough to prevent the soil from drying out down to the seed. If a crust forms over the seed before the plants are up, remove it by a judicious use of a harrow. After the beans are up, shallow cultivation at intervals of from seven to ten days, or after each rain to maintain the soil mulch and keep down weed growth, as in the cultivation of other legumes, is necessary for best results.

The Tepary is a nitrogen-fixing legume and is, therefore, a valuable soil renovator and builder, useful as a catch crop after, or in rotation with, heavy nitrogen-using crops, such as the grains, sorghums, onions, cabbage, etc. The vines produce a hay about equal with alfalfa in feed value and cattle thrive on it. Horses have to be taught to eat it. The yield per acre varies with the soil and the season. The beans can be crushed and used in mixed feed for all kinds of live-stock and poultry as a source of protein to balance the ration where the grain sorghums are fed. For best results, the beans should not be fed whole or as a complete feed, but should be crushed or ground and used in a mixed feed ration.

As a human food, the Tepary possesses a nutritive value about five per cent superior to the commercial Navy bean. They should be soaked in water from one to several hours before cooking and then be prepared for the table as other beans are prepared.

The Division of Markets, State Department of Agriculture, Austin, will furnish any one with information as to where seeds can be secured upon inquiry to it. — The Southwest Farmer and Investor for May 1918.

Has a Good Opinion of Chamberlain's Tablets.

"Chamberlain's Tablets are a wonder. I never sold anything that beat them," writes F. B. Tressey, Richmond, Ky. When troubled with indigestion or constipation give them a trial.

I am Sincere! Stop Calomel! I Guarantee Dodson's Liver Tone

Listen to me! Calomel sickens and you may lose a day's work. If bilious, constipated or headachy read my guarantee.

Every druggist in town—your druggist and everybody's druggist has noticed a great falling-off in the sale of calomel. They all give the same reason. Dodson's Liver Tone is taking its place.

"Calomel is dangerous and people know it, while Dodson's Liver Tone is perfectly safe and gives better results," said a prominent local druggist. Dodson's Liver Tone is personally guaranteed by every druggist who sells it. A large bottle

costs but a few cents, and if it fails to give easy relief in every case of liver sluggishness and constipation you have only to ask for your money back.

Dodson's Liver Tone is a pleasant, purely vegetable remedy, harmless to both children and adults. Take a spoonful at night and wake up feeling fine; no biliousness, no headache, acid stomach or constipated bowels. It doesn't gripe the next day like violent calomel.

CALLED HER FAMILY TO HER BEDSIDE

Six Years Ago, Thinking She Might Die, Says Texas Lady, But Now She Is a Well, Strong Woman and Praises Cardui For Her Recovery.

Royce City, Tex.—Mrs. Mary Kilman, of this place, says: "After the birth of my little girl...my side commenced to hurt me. I had to go back to bed. We called the doctor. He treated me...but I got no better. I got worse and worse until the misery was unbearable...I was in bed for three months and suffered such agony that I was just drawn up in a knot... I told my husband if he would get me a bottle of Cardui I would try it... commenced taking it, however, that evening I called my family about me... for I knew I could not last many days unless I had a change for

the better. That was six years ago and I am still here and am a well strong woman, and I owe my life to Cardui. I had only taken half the bottle when I began to feel better. The misery in my side got less... continued right on taking the Cardui until I had taken three bottles and did not need any more for I was well and never felt better in my life... have never had any trouble from the day to this."

Do you suffer from headache, backache, pains in sides, or other discomforts, each month? Or do you feel weak, nervous and fagged-out? If so, give Cardui, the woman's tonic, a trial.

To All Who Eat—Eat Fish

SHIPMENTS OF MEAT ABROAD INCREASING VASTLY; NATION ON A VOLUNTEER MEAT RATION; HELP THE NATION BY EATING FISH.

Below are some recipes showing manner of preparing fish in many styles, which no doubt will be very welcome to the housewife who is conserving meat.

BOILED FISH
Clean and boil on fish-rack or tie in cheesecloth, 5 to 8 minutes per pound, according to thickness of fish. Place on hot platter. Remove skin and garnish with parsley and lemon. Serve with Hollandaise Sauce and Parsley Potatoes. A sauce is a necessary accompaniment to boiled fish.

HOLLANDAISE SAUCE.
Place all ingredients except hot water in upper part of double boiler. Stir constantly until begins to heat, then add the water and cook until slightly thickened. Chopped cucumbers which have been drained of their liquor may be added just before serving.

PARSLEY POTATOES.
Boil old or new potatoes, then roll in butter and chopped parsley. Season with salt and paprika. Do not serve butter with bread at this meal, as enough fat has been utilized in the above dishes to meet dietary needs.

GRILLED FISH.
Clean and wipe dry—sprinkle with salt and pepper and place in well-greased broiler until done. Slices of fish should be turned often while broiling. Whole fish broil first on flesh side, then turn and broil on skin side till skin is crisp and brown. Remove carefully to hot platter.
Brush with butter and lemon juice and sprinkle over with chopped parsley. Broiling is one of the most delectable ways of preparing fish.

FISH SOUFFLE.
4 Tablespoonsful rice flour
4 Tablespoonsful fat
1 Cup skim milk
1 Cup flaked left-over fish
3 Eggs
1 Teaspoonful salt
1 Teaspoonful pepper
Few drops lemon juice.
Make white sauce from the flour fat and milk and seasonings. Add fish and lemon juice. Fold in the stiffly-beaten egg whites, place in a greased baking dish and bake in slow oven until firm.

FISH STEW.
1 cup cooked native fish—flaked
2 cooked potatoes—sliced or diced
2 tomatoes—sliced, or 1/2 cup stewed tomato
season with
1 tablespoonful fat
few grains pepper or paprika
1 tablespoonful chopped parsley, add
1 cup milk.
Cover casserole with buttered substitute bread crumbs. Bake 1/2 hour.
To butter crumbs: Allow 4 tablespoonful butter or a substitute, as peanut oil, to each cup of crumbs.

GIRLS! LEMON JUICE IS A SKIN WHITENER
How to make a creamy beauty lotion for a few cents.
The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quarter pint of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold creams. Care should be taken to strain the lemon juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.
Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands.

THE TREND OF FOOD NEWS

BAD NEWS

GOOD NEWS

Because S. Friedlander of Tyler, Texas, a merchant, refused to handle promptly a cartload of meal purchased by him, the United States Food Administration has issued an "UNFAIR ORDER" directed to all wholesalers and other licensees, forbidding them to sell licensed commodities to Friedlander for a period beginning May 15, 1918, and extending to June 15, 1918.

For selling flour in excessive quantities, the Worth Milling Company at Ft. Worth, Texas, has lost its Food Administration license.

The decision of the Division of Enforcement is that the mill will be allowed to apply for a new license after June 15, if in the meantime it follows the Food Administration's program, and that its officers are familiar with the rules and regulations of the Food Administration and of the Grain Corporation.

Because of his selling, holding and dealing wrongfully in and with food necessities, L. A. Bletch, a merchant at Otto, Texas, has had all supplies to him from wholesalers and jobbers suspended for a period beginning with May 15th and extending to the 13th day of July, 1918.

The grocery store conducted by Max Gott at 1102 Colorado Street has been ordered closed by the representatives of the Food Administration for alleged violation of the prohibition against the sale of flour on wheatless day. Two other charges were also made against the grocer. One is the failure to observe the rule for closing at 7 o'clock and the other is the disregard of prices promulgated by the price interpreting committee. The action will be taken and the papers are to be forwarded to E. A. Peden, Federal Food Administrator of Texas.

Three Houston, two San Antonio and one Victoria restaurants have been penalized by the Federal Food Administration for Texas because of failure to comply with the rules and regulations, each instance being a case of a use of too much sugar and wheat flour in service. The Houston restaurants are: The Eagle Cafe—Japanese restaurant. Japanese Restaurant, 1111 Congress Avenue. Japanese Restaurant, 407 Congress Avenue. The San Antonio restaurants: The Saratoga Cafe. The Royal Cafe. The Victoria Restaurant: Charlie Johnson.

In each case of a sustained proof of violation, notice that offense has been made against the Food Administration is posted both on the outside and the inside of the public eating place, until its removal is authorized by the local administrator.

The wheatless period for Texas has been extended from June 1 to the next harvest, due to the fact that the shortage of wheat has become so acute that the National Government must use every conservation measure in order to secure sufficient wheat to meet the European demands. In replying to U. S. Food Administrator Hoover's query if Texas would remain wheatless until the harvest, Administrator Peden for Texas replied: "Complying with your message I am requesting all district and county administrators to explain situation and feel safe in assuring you TEXAS will cheerfully continue on wheatless basis until next crop. Our people genuinely enjoy making this sacrifice for our allies and our boys OVER THERE."

Superintendent Mark Riley of the Bureau of Fisheries for Texas, located at San Marcos, says emphatically that PORPOISE MEAT is highly palatable and has begun a campaign, backed by the Food Administration, to encourage the use of porpoise meat as a beef substitute. The purpose of the campaign is not to popularize porpoise meat, which centuries ago was considered a rare viand, but to give the people, the every day folks, a chance to live. With beef at 35 cents a pound and over, beef eating is beyond the hope of the average, and with many has become a lost art. Porpoise meat has the appearance of venison, the flavor of veal and is the flesh of a fish abundant on the Texas coast.

James N. Darrow, representative of the Federal Food Administration for Texas to the onion growers of the Rio Grande, in a recent report to Administrator Peden, states that because of the Government's assistance in marketing and distributing the onion crop for 1918, the grower who had no expectation of more than 65 cents a crate for his onions has received from \$1.00 to \$1.10; and as a consequence the administration has every assurance that the 18,000 acres planted in onions will be immediately planted in other feed and food crops.

There will be no waste in sugar during 1918, nor extravagant use in non-essentials. The United States Food Administration has placed the manufacturer using sugar on a ration basis in order to make certain sufficient sugar to take care of the housewife in her summer program of preserving fruits. The housewife may buy all the sugar she requires for this purpose by submitting statement to her grocer. Nor does the ration plan to the manufacturer affect the home. Sugar may be bought by the consumer in towns and cities in 5-pound packages, and in rural districts in 10-pound packages. The ration, or basis of a ration, still remains 3 pounds per person per month, and all serving should be on this basis.

allows hotels and restaurants to serve, ten proprietors contributed \$560 to the Red Cross Association at a hearing before the enforcement division of the Federal Food Administration for Texas, in the assembly hall of the Chamber of Commerce, Thursday morning. The charges preferred by the Food Administration was an excessive use of wheat flour and sugar.

On Tuesday, May 21, J. L. Stinson, a grocer of Laurel Heights, San Antonio, because of the failure to sell wheat substitutes with wheat flour has been fined \$250 to be paid the Red Cross and is required to close his place of business for two days. The store will be so posted by the Food Administration.

PLAN TO TEST POWER OF FOOD LAW NOW OFF

An injunction suit brought in the 45th District Court at San Antonio by the Alamo Brokerage Company, presumably to test the constitutionality of the food control law and the authority of the Texas Food Administration, has been dismissed by the judge who granted a temporary injunction against Administrator Peden and others.

EATING HOUSES CONTRIBUTE TO THE RED CROSS.

Not as a penalization, but as a return to the government in money of the equivalent of wheat flour and sugar used more than the government

LIFE OF CHILD IN LIFE OF MILK

Now Is the Time to Make Use of a Food Made Abundant by Green Fields and Ripening Grain—No "Little One" Should Be Stinted of Its Milk Ration—Germany Saves Her Children by Saving Her Milk for Their Use; SO MUST WE.

The Food Administration desires to secure economy in the consumption of all kinds of meats without the reinstating of a Meatless Day. There is now an abundance of milk products which can well be substituted in various forms for meat.

If less milk is used, less milk will be produced. Farmers will be obliged to sell their dairy cattle because of the high cost of feeding them, and the failure to find a market for the product, and this country will face the same conditions from which the people of Europe are now suffering. Milk is a cheap animal food. There is at the present time a surplus of both cheese and butter. If these are not used an important outlet for surplus milk has been removed and milk production will diminish.

Where possible, provision should be made to supply each child in the family with a quart of clean, wholesome milk a day. For each adult a pint is desirable when the meat consumption is low. Children should have whole milk, adults may use milk and cheese in place of meat. The present prices of butter have made many families refrain from using it. Those who are able to purchase it should do so. Unless all members of the family are using whole milk, they need some butter in the diet. If the family must economize, the amount of butter may be reduced, but the amount of milk should be correspondingly increased to secure the right total of the fat of soluble growth-promoting substances. The use of butter and cheese should be encouraged since the storage of milk in these forms is an important method of conserving an unmarketable surplus of this food.

E. A. PEDEN,
Federal Food Administrator for Texas.

TEN INSPECTORS AND THREE THRESHERMEN ADDED TO FOOD STAFF.

The inspectors of the State Food and Drug Department have been placed at the disposition of the Federal Food Administration for Texas, and in all ten inspectors have been officially deputized by the Food Administration to check up on food sales over the State. These ten inspectors plus the agents of the Department of Justice who are continually at the disposal of the Food Administration gives to the State Administrator a splendid nucleus for this department of the State work.

The personnel of the inspectors from the Food and Drug Department now centralized consists of Dr. W. H. Minton, Houston; Richard Hudson, Houston; R. A. Buford, Austin; R. H. Hoffman, Austin; D. F. Snyder, Austin; Tom H. Johnson, Round Rock; E. H. Golaz, Austin; Andy Byas, Fort Worth; Jow Jabne, Austin, and C. M. Cocanougher, Denton.

LIFT YOUR CORNS OFF WITH FINGERS

Tells how to loosen a tender corn or callus so it lifts out without pain.

You reckless men and women who are pestered with corns and who have at least once a week invited an awful death from lockjaw or blood poison are now told by a Cincinnati authority to use a drug called freezone, which the moment a few drops are applied to any corn or callus the soreness is relieved and soon the entire corn or callus, root and all, lifts off with the fingers.

Freezone dries the moment it is applied, and simply shrivels the corn or callus without inflaming or even irritating the surrounding tissue or skin. A small bottle of freezone will cost very little at any of the drug stores, but will positively rid one's feet of every hard or soft corn or hardened callus. If you druggist hasn't any freezone he can get it at any wholesale drug house for you.

National and Local Meat Business

The meat business of the country is conducted by various agencies—

By small slaughter-houses in villages—

By local Abattoirs or small Packing Houses in towns—

both

Using only a part of the local live stock supply

and

Furnishing only a part of the local demand for meat.

These slaughtering and distributing agencies fill a well defined but necessarily restricted place in the distribution of the products of live stock.

But only packers like Swift & Company, organized on a national scale, are able to undertake the service that is more vitally important, involving

An Obligation to the Producer
